20. ABSTRACT (Continue on reverse side if necessary and identify by block number) This report deals with certain characteristics of Navy enlisted personnel: age, sex, and race distributions; scores on the Basic Test Battery (BTB) and Armed Services Vocational Aptitude Battery (ASVAB); Mental Group distri- butions; educational degrees; years of education; and enlistments. These characteristics are examined by Navy Occupation groups, ratings, and pay grade clusters (E1-E3, E4-E6, and E7-E9) for the years 1972, 1973, 1974, 1975, and 1976. Volume 1 of this report is a summary and analysis of trends by personnel characteristics, including implications for technical data

FORWARD

These tables were developed in connection with a research project to investigate a relationship among the personnel characteristics of Navy technicians, the nature of job tasks performed by these technicians, and the modes by which technical information is presented to technicians for the performance of job tasks. This project is in support of the Navy Technical Information Presentation Program (NTIPP), a research and development activity to make improvements to the delivery of technical data to Fleet technicians.

This particular NTIPP effort involves four principal parts as follows:

Part I: Generic Job Tasks - The identification of those categories of job tasks, which are common to all or most of the technical Navy ratings, and which usually require technical data presentation for their performance.

Part II: Personnel Characteristics - The identification of trends and variations in the aptitudes of Navy enlisted personnel according to their Navy occupation specialties (ratings).

Part III: Presentation Modes - The identification of a useful inventory of formats for presenting technical information.

Part IV: Decision-making Model - The development, from 1, 2, and 3 above, of a tentative model for selecting presentation modes according to personnel aptitudes and job task categories.

The tables of this volume are related to Part II: Personnel Characteristics. The report on Personnel Characteristics comprises two volumes:

- (1) Volume 1: Summary and Analysis
- (2) Volume 2: Data Tables

Note: There are no tables for Occupation Groups X and XI because there is only one rating (HM's and DT's respectively) in each Group.

The CS and SD ratings were absorbed by the MS rating in 1975.

The PT rating was absorbed by the IS rating in 1976.

CHARACTERISTICS

The personnel characteristics reported in the tables are:

1. Age, Sex, Race.

2. Test Scores.¹

a. Subtests of the Basic Test Battery (BTB)

GCT = General Classification Test

ARI = Arithmetic Reasoning

MECH = Mechanical Comprehension

b. Subtests of the Armed Services Vocational Aptitude Battery (ASVAB)

WK = Word Knowledge

AR = Arithmetic Reasoning

MC = Mechanical Comprehension

c. AFQT: Armed Forces Qualification Test. A GAM (i.e., GCT + ARI + MECH) score is translated into an equivalent AFQT percentile score. The AFQT percentile score determines one's Mental Group category.

3. Mental Group Categories.

a. Five Mental Group categories and their BTB/AFQT derivations are:

<u>Mental Group</u>	<u>G + A + M Score</u> ²	<u>Equivalent AFQT Percentile Score</u>
I	194 & above	93 - 99
II	163 - 193	65 - 92
III	135 - 162	32 - 64
IV	103 - 134	10 - 30
V	103 & below	8 - 9

b. The Navy divides Mental Group III into upper III (GAM, 148 - 162; AFQT, 49 - 64) and lower III (GAM, 135 - 147; AFQT, 32 - 48) in order to differentiate between personnel eligible for a Navy school (Mental Groups I, II, and upper III) and those who are not.

¹The BTB was replaced by the ASVAB as of 1 January 1976. Therefore, FY's 72, 73, 74, and 75 show GCT, ARI, and MECH scores only. FY 76 is a combination of GCT/WK, ARI/AR, and MECH/MC scores.

²Based on BTB8-AFQT battery. Although Mental Group categories formerly were derived from a combination of GCT/ARI/MECH scores from the BTB battery, the sub-tests for defining Mental Groups from the ASVAB are Word Knowledge (WK), Arithmetic Reasoning (AR), and Spatial Perception (SP).

4. Educational Degrees.

5. Years of Education.

6. Enlistments.

First enlistment is usually for four, five, or six years. Each reenlistment (enlistment #2 and after) can vary in length, usually from two to six years.

7. Mental Group Categories by Enlistments.

Two characteristics are combined to show the percent of those in each Mental Group category who are in their 1st, 2nd, and 3rd (or higher) enlistment.

EXPLANATORY NOTES

1. Complete, Known, and Unknown Figures

Counts, percentages and scores for each rating and occupation group are based on known figures. Complete figures minus unknown figures equal known figures. "Unknowns" occur in cases in which the Enlisted Master Tape maintained by the Bureau of Naval Personnel does not contain a piece of information (e.g., BTB scores) for a person. In most instances (e.g., virtually every table for Age, Sex, and Race), complete and known figures are identical. Percentages calculated from known counts (e.g., Mental Group categories) are considered to be representative of complete counts because the known counts are extremely high and because there is nothing peculiar about the unknown group.

2. Average Test Scores

The N shown for each pay grade and year for the years 1972-76, is the complete count of personnel in that pay grade category for that year. In many cases, however, the N upon which average scores are computed is significantly less than the complete N because of unknowns. Since there is nothing unusual about those personnel for whom test scores are omitted on the Enlisted Master Tape, it is likely that even a small N is sufficiently random in nature to yield a valid average test score. Nevertheless, in the interest of complete accuracy, average test scores have been left out of tables when the N upon which they would be calculated is less than 25%. Scores based on an N of 25% to 50% are so designated in each table.

3. Percent Figures

The "TOTAL" for a percentage column (e.g., AGE, SEX, RACE; EDUCATIONAL DEGREES; etc.) will always show "100%," even though the aggregate of the numbers in a column might sometimes be less than 100. The reason for this is that the computer program developed to access the Enlisted Master Tapes called for dropping, rather than rounding off, fractions of a percent -- even when .5 or above. For example, a 38.6% on the Enlisted Master Tape appeared on the print-out as 38% rather than 39%. Consequently, a percent figure could be as much as .9 of a percent higher than shown.

4. Mental Group Categories by Enlistments

These data are shown by ratings, but NOT by Occupation Groups.
